Personal Statement

About Me

A Computer Science undergraduate about to complete my 2nd year of studies at the National University of Singapore, I have undertaken internships and various projects from start-ups and as part of certain courses. These different opportunities have enabled me to develop not only specific IT industry experience, but also a valuable and transferable skill set in this fast-paced sector.

Work Experiences and Projects

Before enrollment into University, I worked at 361 Degree Consultancy, a company providing software solutions and accounting advisory. I worked as an IT Support Intern there for a period of 3 months and was tasked with providing client support and acted as an administrator for the company's database.

In the next summer, I worked as an Android App Developer for a local startup called DingleTutors. Right now, I am working with the same startup as a Full Stack Intern, to manage their database and website. I have also worked as a Teaching Assistant for 1 semester and tutored freshmen for a foundational Computer Science course. During this period, I conducted tutorial sessions for the students while creating and grading assignments.

Unique Skill Set

During all my work stints, I have always been faced with challenges that I have been expected to solve quickly and independently, but I have been able to get them done on time. As a Teaching Assistant (TA), I was tasked with creating the first assignment using Markdown and Latex despite having no prior experience using them. Despite this, I was still able to get it released on time for the students to attempt on our online programming environment. I also developed new ways to publish programming contests that were part of our course to make it easier for new TAs.

I have also been involved in teaching positions during many portions of my life, such as during National Service when I was an instructor for recruits in our Basic Military Training Center. These positions have allowed me to understand people and the problems they have better, making it easier to work with them.

How I Can Contribute

From my different work experiences and projects, I have obtained much experience on software engineering and full-stack development. In addition to Windows, I have been using a Linux OS for over a year, so I am proficient in it as well. I have also been learning about deep learning using the fastai library in my own time. I am confident that with any relevant roles, I will be able to not only contribute meaningfully via the technical skills I possess, but also be able to make the company function more efficiently.

Internship Objective

I hope that through this internship, I can get more meaningful work experience in the IT industry, whilst forming new connections with the people in the startup. I also wish to decide on what my future area of focus will be through my experience from the internship. Lastly, I want to find out experience how working in Silicon Valley will be like.

Education

Aug 2016 - Present	National University of Singapore Bachelor of Computing (Computer Science) (Course details in Appendix A)	Singapore
Jan 2008 - Dec 2013	NUS High School of Mathematics and Science <ul style="list-style-type: none">• High Distinction with Math and Chemistry Honors, Physics and Economics Majors• Conducted an Advanced Research Project as a team of 2: Self-assembly in coordination chemistry	Singapore

Work Experience

Aug 2017 – Dec 2017	NUS School of Computing <i>Teaching Assistant</i> <ul style="list-style-type: none">• Taught a foundational computer science module• Conducted tutorial sessions for freshmen• Carefully mentored 8 students and worked through their queries• Set and graded their assignments	Singapore
May 2017 - Aug 2017	DingleTutors <i>Android App Developer (Orbital program)</i> <ul style="list-style-type: none">• Worked as an Android developer for the startup DingleTutors• Achieved highest level in the Orbital Program (Apollo 11)• Carried out poster presentation attended by 100 teams	Singapore
Mar 2016 – June 2016	361 Degree Consulting Pte Ltd <i>IT Support Intern</i> <ul style="list-style-type: none">• Carried out onsite installation of software• Set up local file-sharing networks and provided client support• Acted as admin for company's server• Dynamically tackled IT problems faced by colleagues	Singapore

Scholastic Achievements/Extracurricular Activities

Aug 2016 - Present	Scholarship SPRING Executive Development Scholarship (EDS)	Singapore
May 2017	Cyber Defenders Discovery Camp (CDDC) <ul style="list-style-type: none">• 2-day team competition to solve cyber security challenges• Won second place prize of \$4000	Singapore
Aug 2016 - Aug 2017	Computing Club <ul style="list-style-type: none">• Committee Executive of Sports Committee• Planned and conducted annual Sports Camp for 80 participants	Singapore
May 2013 - Dec 2013	Overseas Community Involvement Program (OCIP) <ul style="list-style-type: none">• Head of PR and Logistics for OCIP• Raised over \$3000 for refurbishments in a Cambodian school	Singapore

Skill Sets & Proficiency

Programming	Java	Proficient
	Python	Proficient
	JavaScript	Proficient
	C	Intermediate
	Ruby	Intermediate
	Shell Scripting	Basic
Web	HTML, CSS	Proficient
	Ruby on Rails	Intermediate
	React	Intermediate
	PHP	Basic
Database	PostgreSQL	Intermediate
	ActiveAdmin	Intermediate
Version Control	Git	Proficient
	GitHub	Proficient
	Bitbucket	Proficient
Mobile App Dev	Android	Proficient
Markup	Markdown	Intermediate
	AsciiDoc	Intermediate
	XML	Basic
Security	Disassembly	Basic
	File System Security	Basic
	Network Security	Basic
	Basic Firewall (iptables)	Basic
Operating Systems	Linux	Proficient
	Windows XP, 7, 10	Proficient
Productivity Tools	Microsoft Word	Proficient
	Microsoft Excel	Proficient
	Microsoft PowerPoint	Proficient

Language Proficiency

Spoken	English – fluent; Tamil – fluent
Written	English – competent; Tamil – average

Additional Information

- Learning about Deep learning using Python, through online fastai courses
- Learning how to play the guitar

Degree: Bachelor of Computing (Computer Science)
Cumulative Average Point: 4.73 / 5.00

List of Courses

Type	Course Description	Grades
Programming, Data Structures and Algorithms	Programming Methodology	A+
	Data Structures and Algorithms	A-
	Design and Analysis of algorithms	A-
	Discrete Structures	A-
General Computer Science Electives	Introduction to Computer Networks	A-
	Computer Organization	A-
	Introduction to Operating Systems	A
	Introduction to Information Security	A+
	Computer Security	In-progress
Math and Science	Linear Algebra 1	A-
	Calculus for Computing	A
	Physics 2	A
	Probability and Statistics	In-progress
Software Engineering	Orbital* (Independent Software Development Project)	CS
	Software Engineering	In-progress
Communication	Computing and Society	A-
	Roots and Wings – Personal and Interpersonal Effectiveness 1.0	CS
	Effective Communication for Computing Professionals	In-progress
General Electives	Quantitative Reasoning	A+
	The Biophysical Environment of Singapore	S
	Asking Questions	CS
	Traditional Chinese Knowledge of Health and Well-being	In-progress

* **Orbital** was a summer project that was done between Year 1 Semester 2 and Year 2 Semester 1. Students worked in pairs and could choose the nature of their project and their area of focus. Along the way, teams received guidance on their rate of progress and other recommendations from mentors who were part of the program.

NUS Grading Scale:

A+ & A (5.0); A- (4.5); B+ (4.0); B (3.5); B- (3.0); C+ (2.5); C (2.0); D+ (1.5); D (1.0); F (0)

S = Satisfactory; U = Unsatisfactory

CS = Completed Satisfactorily; CU = Completed Unsatisfactorily

EXE = Exempted; IC = Incomplete; IP = In Progress; W = Withdrawn
